

In July 2010, the District's docket clerks began docketing entries based on a case's **terminal digit**

instead of docketing for a particular judge. A case's terminal digit is the last digit in the case number. For example, the terminal digit for case number 10-cv-5678 would be eight, and, therefore, a question regarding a docket entry in that case could be directed to the docket clerk assigned to eight for civil cases. These assignments are listed below.
